

## FOR IMMEDIATE RELEASE

### **Scott Paul Shields Announces Exploratory Candidacy for Governor of California: A Bold Vision for a Free, Healthy, and Transparent Future**

**Sacramento, California — August 16, 2025** — In a bold move to redirect the future of the Golden State, Scott Paul Shields today officially announced his candidacy for Governor of California under the banner of **Change2i.com – Vote The Candidate, Not The Party**. Shields is calling on Californians to "Demarxify" and reclaim the values of America's Founding Fathers — ideals that stand in direct opposition to Marxism.

"California is at a breaking point emotionally — buried in leadership propaganda, plagued by collusion, and most likely corruption. It is time for a second technology revolution," said Shields, originator of Quasi Noggin Technology in 1983 and current Co-Founder of a cryptography solutions company. "It's time for a total systems reboot — not reform."

To achieve this, Shields has assembled a team of experts to advance the priorities listed at **Change2i.com**.

Shields' slogan, *Vote The Candidate, Not The Party*, is intended to remind voters — and political party candidates alike — that party affiliation alone does not guarantee support. "You don't have my vote just because you carry a party label," Shields emphasized. "You need to earn it by offering real solutions to real problems. Californians already know the status quo talking points — and those 'solutions' are exactly why the issues remain unresolved".

The Shields for Governor platform highlights **six transformative priorities** as the foundation for broader reform. While acknowledging critical issues such as homelessness, crime, immigration, housing costs, healthcare, and taxes, Shields maintains that lasting change begins with these core initiatives:

- 1) **Demarxify Yourself:** A campaign to awaken Californians to why Marxism is not compatible with America's founding principles.
- 2) **Prevent Cancer and Alzheimer's:** Introducing new proofs and approaches beyond current medical consensus for the prevention and potential cures of cancer and Alzheimer's disease.
- 3) **Erase California's Debt:** A complete elimination of the state's deficit.
- 4) **Pardon Don Bohana:** A moral call for justice in the Don Bohana case.
- 5) **Eliminate Election Fraud:** Rebuilding trust in California's elections by implementing the only electronic voting system known to be secure, verifiable, and trustworthy.

6) **Create a Crypto Commission:** Establishing a commission responsible for protecting crypto users' assets, encouraging responsible innovation, and future-proofing California's economy

"California is still the land of dreams," Shields added. "But those dreams are being crushed under a state government addicted to Marxist ideology and control. It's time to choose a different future — one powered by integrity, technology, and solutions that truly solve problems."

**Scott's CV Card since 1983:**

*"The intersection of progress and tradition is fraught with alienation until success. If you want to change the future, then create something that contributes to doing so. Progress is not anarchy — that is merely the path to the oppressed becoming the oppressor. The new oppressor becomes the new tradition. America's Revolution was an intellectual revolution, and its ideals remain the only ones in history designed to unite progress and tradition in the pursuit of peace and prosperity. All other systems of government and ideology exist to impose control, inevitably resulting in chaos, violence, civil wars, border wars, and world wars. California must look inward now, rejecting government propaganda and solutions tied to Marxism. Once this is achieved, the rest becomes easy."*
